

Bunge Global Quality, Food and Feed Safety Policy

This Global Quality, Food and Feed Safety Policy reflects Bunge's fundamental commitment to delivering safe and high-quality products to our customers worldwide. It is the foundation of our integrated management systems and aims to guide the actions of every employee.

Our Global Quality, Food and Feed Safety Policy Vision

Bunge is dedicated to being the trusted leader in delivering essential products of uncompromising quality and safety, protecting the health and well-being of consumers around the globe.

Our Commitment

As a global manufacturing and supply chain leader of essential food, feed and fuel, Bunge employees and leadership are fully committed to supplying high-quality, safe products, and providing all necessary resources to uphold this commitment.

Our Principles

- We develop upon and support a food and feed safety culture where employees are engaged and held accountable for their quality, food and feed safety responsibilities.
- We continually build our teams' skills through training and ensure all employees understand their roles and responsibilities in producing safe and high-quality products.
- We ensure our performance meets statutory, regulatory and contractual requirements, and global certification standards by proactively monitoring and implementing necessary changes.
- We implement and rigorously maintain a Quality, Food and Feed Safety Management System that ensures standardized policies and best practices.
- We apply a risk-based approach to mitigate potential hazards and prevent product quality and safety incidents.
- We maintain key performance indicator metrics to make data-driven decisions that align with our continuous improvement approach.
- Our organization is structured to avoid conflicts of interest between the production and trade of products and operational requirements.
- We establish strong partnerships with our suppliers and third-party facilities, ensuring adherence to Bunge's high standards for quality and product safety.
