

Domestic outturns

Information for commercial clients

We provide domestic outturn services to grain buyers who have purchased grain in our South Australian and western Victorian network.

We facilitate this service by managing stock availability at a regional basis. At times outturn sites may vary from where the stock was delivered or bought.

Our stock management system allows customers to access grain throughout the year, including during peak harvest and export shipping periods.

Domestic outturn conditions for grain buyers are set out in Schedule E of the **pricing, procedures and protocols manual**.

Arranging a domestic outturn

1. By 12pm Tuesday the week before you would like to outturn grain, email Domestic_Outturns@bunge.com outlining the tonnage, grade and site requirements.
 - If your weekly requirement exceeds 3000 tonnes, please provide 2 weeks' notice.
2. We will confirm site availability by Thursday. If the requested site is not available, we will work with you to find a suitable alternative where possible.
3. Complete and return the provided order form by 12pm Friday.
4. Once the order is confirmed, the carrier can contact the site to arrange pickup, by no later than 1.30pm the business day prior to the pick-up date.

If outturned grain does not meet the outturn quality standards, please refer to Schedule H of the **pricing, procedures and protocols manual** and contact us as soon as possible.
